“Service That Builds Friendship”

Our service is such that it cements a lifelong patronage.

We look beyond the mere making of a sale, and genuinely interest ourselves in our patrons' requirements and the welfare of their gardens.

Years of practical experience have equipped us with a knowledge that enables us to give a service of an unusual kind—a service that has been appreciated by the community for over 70 years.

We are thoroughly conversant with our trade and can tender helpful advice, and cordially invite your enquiries from time to time.

“Our Greatest Pleasure is in Pleasing You”

SEEDS.

SEARL'S SOVEREIGN SEEDS are known and grown Australia-wide, and embody the WORLD'S CHOICEST STRAINS. Our packets, which are FULL-SIZED, contain HAND-CLEANED, OUTDOOR-TESTED SEEDS, and represent the BEST VALUE OBTAINABLE.

PLANTS.

Our GENUINE NURSERY-GROWN STOCK is true to label, and our plants are thoroughly hardened off before being offered for sale. STURDY and SHAPELY PLANTS have contributed a good deal towards voicing our name throughout the States.

FLOWERS.

Whenever flowers are desired, the name of Searl's instantly suggests itself, maintaining a coveted supremacy won on merit alone. Its mere mention instinctively conjures up visions of the beautiful, suggesting a distinctive tone, genuine value, and satisfactory service.

ADVICE.

We have gained the full confidence of the gardening community in this respect. Our vast and varied experience as practical nurserymen, and landscape artists, is at the service of our patrons. Our assistants are all qualified men, thoroughly conversant with their business, and can tender you helpful and practical advice.

Office and Retail Establishment:

397 GEORGE STREET - - SYDNEY

Queensland Address: No. 5 Brisbane Arcade, Brisbane

Telephones:

CITY 6423, 6424, 6425.

Cable Address:

"MYOSOTIS," SYDNEY.

A.B.C. Code, 5th Edition.

TERMS OF BUSINESS:

ORDERING, ADDRESS, Etc.

When giving orders, send name and address in full, with directions as to route, and to whose care goods must be consigned. Please use the Order Form in this catalogue.

WE CAN SELECT FOR YOU.

When the choice of varieties is left to us we select the most desirable colours and varieties, all correctly labelled.

PLANT ORDERS.

All orders received are subject to the possibility of some plants not being in stock at the time. All varieties cannot be had at all times of the year. If we have not the varieties required in stock, careful substitution will be made. When customers do not desire this, they should add a few extra names for the purpose of enabling us to complete the number of plants ordered.

OUR PACKING.

We shall at all times see that goods are well and securely packed, but after despatching such goods our responsibility for any loss, damage or miscarriage ceases.

CARRIAGE OF GOODS.

Retail orders for Vegetable and Flower Seeds (except heavy goods, such as Peas and Beans, either in packets or in bulk) are sent **post free** to any part of the Commonwealth. The railage or freight on a rail or steamer journey for Potatoes, Plants, Flowers, Fruit Trees or Implements (either alone or as part of a general order) is charged to our client.

POSTAL CONVENIENCES.

The Parcels Post System is simple and economical for the despatch of Seeds, Plants, and Cut Flowers, and we receive very flattering testimonials as to arrival of Flowers and Plants in good condition.

LOST ORDERS.

Letters are sometimes lost in the post. If you do not get our reply to your order within a reasonable time, please send us a duplicate order, stating when and in what form order was sent, and sign the same name and address as in the first order, so that it may have immediate attention.

HOW TO REMIT.

By Cross Cheque (on any Bank), Postal or Post Office Order, payable at Sydney. Small amounts may be remitted in Stamps. No receipt sent for sums of 2s. 6d. unless stamp is enclosed to cover postage. Do not send coin in a letter.

CREDIT.

To our established customers, retail accounts are rendered monthly, but we expect prompt payment on receipt of account. Orders from unknown purchasers must be accompanied by a remittance, or a satisfactory Sydney reference.

All communications should be addressed to the Firm, at 397 George Street, Sydney, and not to individuals.

We want your business. No order too large or too small to receive personal and prompt attention.

Correspondence invited.

IMPORTANT.

DELAYS IN TRANSIT.

We feel that we cannot emphasise sufficiently the importance of customers not only writing their names and full addresses plainly, but acquainting us with the speediest and safest route, thereby reducing the risk of delay on perishable goods to a minimum.

Although all plants and roots leaving our establishment are carefully packed and in good condition, we wish it clearly understood that we cannot accept any responsibility relating to goods arriving in a perished or damaged condition.

Forwarding directions should therefore be made as explicit as possible in order to obviate any possibility of delay in transit.

To further facilitate matters we would also ask our clients to keep the **ORDER PORTION** of their letters **APART** from the **CORRESPONDENCE** contained therein.

SEARLS LTD.

CONDITIONS OF SALE.

We believe that all seeds, bulbs and roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this we give no undertaking that such seeds, bulbs or roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We, further, give no warranty, expressed or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold on these terms, they are at once to be returned to us.

Searl's Novelty Roses For 1926

The new roses this year are an exceptionally fine lot, well above the average, and up to description in every particular.

They will be ready for distribution from April onwards.

PRICE, 4/- EACH, Postage Extra.

ALLEN CHANDLER (H.T.) (George Prince.) Colour vivid scarlet, nearly single, carried in clusters of $\frac{3}{4}$ blooms. This is the finest and most effective pillar rose we have, flowering very early, and late. Has been awarded the National Rose Society's Gold Medal; also the "Cory Cup" as the best English raised Climbing or Pillar Rose.

ANGELE PERNET (Pernetiana perpetual flowering). (Jh. Pernet Ducher). A very vigorous and hardy grower of erect branching habit, handsome large shiny bronze green foliage, oval shaped bud, large, full, globular flower carried erect, colour a wonderful reddish orange, shaded and bordered with chrome yellow; outside of petals fiery golden yellow, very sweet. Awarded the Gold Medal Bagatelle, Paris, 1924.

BARBARA ROBINSON (H.T.) Colour cream, growth very vigorous, free branching habit, extremely floriferous, producing blooms with the greatest profusion throughout the season, and for this is bound to be much in demand. The buds are very long and pointed, opening cleanly in all weathers to a well shaped flower. Foliage is abundant and good. Sweetly scented.

CLIMBING SUNSTAR (H.T.). A climbing sport of the well known and popular bedding variety. A very novel and valuable introduction, and one that will be greatly appreciated.

DUCHESS OF YORK (H.T.) Strong, vigorous, free branching growth with handsome light green foliage. Flowers large, very full and of fine form. Colour in the young stage deep golden yellow, with tangerine centre deepening as the flower ages to orange tangerine, with colour spreading from the centre of the flower and suffusing the whole flower to the outermost petals.

FRAU FELIX TONNER (H.T.) (Leenders & Co.) Bright Rose with a coppery orange base, buds large, semi-double, very fragrant. Growth is vigorous, compact and continuously blooming. Good bedding Rose. Awarded Certificate of Merit, Royal Holland Society of Horticulture.

GOLDEN PIRRIE (H.T.) (Collins). A Golden Yellow sport from "Lady Pirrie."

GOOILAND BEAUTY (H.T.) (G. A. Van Rossem). (Golden Emblem X Sunburst). Flowers large, semi-double, two rows of petals with prominent yellow stamens. Colour clear golden orange. The blooms keep their colour very long and shade off to a creamy yellow. Growth vigorous, very free flowering, practically always in bloom throughout the whole season until late Autumn. It is one of the best semi-double Roses for bedding, etc.

JOHN RUSSELL (H.T.) (Dobbie & Co.) The colour is a deep shade of velvety crimson, overlaid with black sheen, the petals are large, flowers are ideally double and are of perfect form. The growth and habit are of typical Hybrid Tea character.

PHILOMENE POLLARET (H.T.). L. H. Pollaert). This new Rose is the issue of General MacArthur and Old Gold. The flowers are beautiful crimson with

orange, are of good size, full and well formed. Growth is vigorous and free with leather like foliage, free from disease. Very sweetly scented. It has received two certificates of merit, and is very highly spoken of by leading Rose Growers.

PINK PEARL (H.T.) (M. Leenders & Co.) The colour is bright rose with a salmon base, flowers of medium size and sweetly perfumed, growth vigorous and erect and disease resistant. Continually blooming. Awards: Certificate of Merit, Royal Holland Society of Horticulture. Great Silver Gilt Medal "Nos Jungunt Rosae."

PRINCESSE MARIE JOSE (H.T.) (Klettenberg-Londes). Growth vigorous and erect branching habit, flowering freely, long and pointed bud orange and vermillion with purple lacquer reflections, flower large, full and with high centre, colour orange vermillion on yellow, back ground centre velvety orange red, fruit like perfume. Awards: Brussels, 1923, Certificate of Merit and Gold Medal; Ghent, 1924, Certificate of Merit.

ROSELANDIA (H.T.) (W. Stevens.) A fine new Yellow Rose, a sport from "Golden Ophelia." It is a vast improvement on the original, being much larger in flower and deeper in colour, in addition to which it has a high pointed centre and every flower comes perfect in form and is carried on a rigid stem.

SALTAIRE (H.T.) Colour velvety crimson shaded scarlet. Growth is vigorous and upright branching habit; flowers are freely produced on upright stems. The bloom is of medium size and of perfect form, and the long buds opening with a high pointed centre. Good foliage, free from mildew and black spot. Most pronouncedly and delightfully fragrant.

SCARLET GLORY (H.T.) Vermilion scarlet, the most vivid self coloured rose yet raised. Growth is vigorous, of free branching habit and is very floriferous, having abundant dark green foliage which is not subject to mildew or black spot. The bloom, which is of good size, is beautifully formed and opens well in all weathers. A garden and bedding Rose of the greatest merit, by reason of its wonderful colour and free and continuous flowering qualities.

SENSATION (H.T.) (E. G. Hill Co.) This Rose is a Sterling novelty of great merit and is a big advance on all Roses of similar colour, which is an entrancing shade of rich crimson, velvet red. The bud is long and pointed and the double open flower of great size and exceedingly beautiful, a vigorous grower and very sweetly scented.

REIMS (Pernt.) (Barbier & Co.). Long superb bud, solid petals, round, very large, outside fleshy pink with yellow aiglet, centre bright nankeen shaded fire or apricot, orangey, coppery, superb colouring.

SUPERB (H.T.) (F. Evans). Colour silvery pink, of clear soft tone, with deeper shading on back of petals, flowers full, of large size and excellent form, a free flowering and good vigorous grower. Awards: Certificate of Merit by the National Rose Society, June, 1924. The Woosnam Silver Cup for the best Rose raised by an amateur, June, 1924.

Recently Introduced Roses at 2/6 each.

Our policy has always been to curtail, rather than unnecessarily increase the ever-growing list of varieties. We contend there are too many sorts, and from time to time we will be gradually omitting the inclusion of the less popular types in our catalogue.

Many varieties are remarkably similar, whilst others are of weakly growth, and do not take kindly to our climes. Each year brings an influx of novelties, and although we consider our general list sufficiently inviting for the average enthusiast, yet we will be only too pleased to submit the names and descriptions of the latest introductions upon request.

AMELIE DE BETHUNE (Pernetiana). Pernet Ducher, 1924. A very vigorous grower, of bushy and erect growth; bronze green foliage; oval shaped bud; globular flower. Color, coral red, shaded with cochineal. Free and hardy.

ASUN GALINDEZ De CHAPA (H.T.) Ketten Bros., 1924. A superb combination of color; the inner face of petal is salmon and shrimp pink; the outer and reverse petal is salmon carmine, with Indian yellow at base. The bloom is large and highly centred. Growth vigorous.

BLANCHE MESSIGNY (H.T.). F. Gillot, 1924. Flower very double; Nankeen yellow passing to creamy yellow; sweet scented; growth vigorous and branching. Very beautiful.

CHASTITY (H.T.). Frank Cant & Co., 1924. White, with a faint streak of yellow at base of petals. Flowers of moderate size and perfectly formed, with high pointed centre, and are carried in trusses of five to ten blooms. Growth vigorous. A climbing pillar Rose, well worthy of notice.

ETTIENE REBILLARD (Pernetiana). Pernet Ducher, 1924. A vigorous grower, of spreading habit; light green foliage, long bud, very full globular flower, cactus shaped petals. Color, salmon, carmine, with lighter reverse. Valuable for garden decoration and cut flowers.

FRED J. HARRISON (H.T.). Alex. Dickson & Sons, 1923. The flowers are a cardinal red color, suffused with crimson and splashed with blackish crimson towards edge of petals, which are large and of great substance. Awarded Gold Medal at the provincial Show, 1923.

FRAICHEUR (Wich. Hybrid). Turbat & Co., 1924. Pyramidal clusters of 20 to 30 flowers; color, fresh tender rose; growth strong and vigorous, with beautiful deep green foliage.

GEORGE H. MACKERETH (H.T.). Alex. Dickson and Sons, 1923. Vigorous growth; free branching habit. The blooms are carried on very stiff stems, and are sweetly scented. Color, deep crimson, shaded velvety maroon. Awarded Certificate of Merit, National Rose Society.

GWYNNE CARR (H.T.). Alex. Dickson & Sons, 1923. The buds are long and pointed, opening with petals of great substance. Color, shell-pink to pale lilac rose, increasing in centre to deeper rose, with a distinct zone of yellow at base of petals. Awarded Certificate of Merit, National Rose Society.

GOLDEN MADAM SEGOND WEBER (H.T.). Souper et Notting, 1924. Color, salmon, centre golden yellow; flowers enormous size, full, of good substance, with long stiff petals. Growth strong and vigorous.

DWARF TEA AND HYBRID TEA VARIETIES

These are continuous bloomers, and highly fragrant. Though not so hardy as the Hybrid Perpetuals, they will stand a moderately severe frost. A succession of good flowers may be obtained throughout the growing season by cutting back the flowering branches to within an eye or two of the old wood. The Roses comprising this list are all among the very **best grown**, and are all suitable for Australian conditions. Those varieties known to be Hybrid Tea are followed by the initials H.T. Price 1s. 6d. each, 16s. per doz. Postage extra.

HYDRANGEA (E.F.S.)—

We wish to advise clients, to prevent disappointment, that the blue and pink shades are uncertain. It is generally supposed that

iron, slate, or lime in the soil will produce blue, but this is not always so. This is a problem that up to now has not been solved.

We stock a splendid assortment of these hardy, free-flowering plants. Prices from 1/6 each. Full list and descriptions upon application.

SPLENDOR. A perfect freestone. Ripens ten days before "d'Agen."

SUGAR. Fruit even size. Very large. Prolific.

TRAGEDY. Fruit large. Deep purple. Flesh yellow.

PEARS

This choice fruit is very much neglected in this State, the only apparent reason being that the tree does not come into bearing as early as other fruits. Planters should remember, however, that if they take a year or two longer to arrive at the bearing stage, they will, with fair treatment, be yielding heavy crops when other fruits of the same age are worn out. They will outlive two or three generations of stone fruits. All Pears are worked on seedling stocks.

Abbreviations: E signifies Early Season; M, Medium; L, Late.

Price: 1s. 9d. each; 18s. dozen
